

WOUND CLOSURE STRIPS

**EPISEAL®**

EPISEAL®

- Unequalled tensile strength, flexibility, and conformability
- Secure, non-irritating
- Rounded edges stay securely in place
- Unique adhesive coating permits high breathability

 DeRoyal®

## WOUND CLOSURE STRIPS

# EPISEAL®

### PROVIDE YOUR PATIENTS WITH A SUPERIOR WOUND CLOSURE STRIP.

Episeal is a superior product that solves many of the problems associated with wound closure strips today. Just compare:

Problems	Episeal Solution
Poor initial adhesion requires the use of benzoin as an adhesive aid.	Episeal's unique adhesive coating results in a secure, aggressive attachment that isn't irritating, eliminating the need for benzoin.
Edges curl up and lift off the skin.	Episeal's rounded edges remain securely in place.
Low breathability and aggressive adhesion cause blistering of skin surface.	Episeal's unique adhesive coating permits high breathability, greatly reducing the chance of blistering.
No stretch results in a rigid, unsecure closure.	Episeal's special fibers provide unequalled tensile strength, flexibility, and conformability.

Product #	Size	Strips/Pouch	Pouches/Box	Boxes/Case
46-211	1/8" x 3"	5	50	4
46-212	1/4" x 3"	3	50	4
46-213	1/4" x 4"	10	50	4
46-214	1/2" x 4"	6	50	4
46-215	1/4" x 1 1/2"	6	50	4
46-216	1" x 5"	4	25	4
